

All YLS issued laptops have the Cisco AnyConnect VPN client installed. You may have the Cisco AnyConnect application in your dock, , or, if not, search for it using the spotlight search. 

1. Open the app.
2. Enter **Access.yale.edu** if not pre-populated.

3. Enter your NetID and password. In the third field Type **Push, SMS, or Phone** to tell Duo how you want to authenticate, you may also enter a **Passcode** generated by a hardware token or your DUO Mobile app.

4. Depending on what you choose in Step 2 you will be prompted to authenticate via a second authentication result.
 - o If you chose **Push**, simply tap **Approve** on your mobile device and you will be logged in to your desired application.
 - o If you chose to type a **Passcode**, you will be logged in to your desired application.
 - o If you chose **Phone Call**, follow the prompts when you are called and you will be logged in to your desired application.

In your status menu area (upper right) you should have an icon now that looks like:  which shows that your VPN is active.
